

**Do you own a  
smartphone?**

**Do you hear voices or  
experience reality in a  
different way?**

## **RESEARCH STUDY OPPORTUNITY:**

We are a group of researchers at Massachusetts General Hospital who are interested in understanding more about hearing voices or experiencing alternative realities (e.g., seeing things that other people do not), for individuals who experience this on a daily basis.

### **Can I take part?**

You may be able to enroll if you:

- Experience reality in a different way, e.g., hearing voices or seeing things others do not
- Are between 18 and 50 years of age
- Have access to a smartphone
- Live in USA
- Do not have a neurological impairment (e.g., epilepsy, brain tumor or trauma)

### **What does it involve?**

You will be asked to complete short surveys on your mobile phone over 14 days. The surveys will ask about your current experiences, mood, and the way you are currently thinking about yourself. You will be compensated for your time.

If you are interested in participating, please visit
