

CME OVERVIEW
Intraoperative Ultrasound Program
April 29, 2021

Target Audience

This activity is designed for neurosurgeons who want to learn more about state-of-the-art usage of intraoperative ultrasound in neurosurgery. The panel of International neurosurgical experts will share their experience on using ultrasound in neurosurgical procedures. They will discuss the newest technology, technique, to maximize extent of resection, safety in neurosurgery, and real-time intraoperative imaging.

Learning Objectives

At the completion of this activity, participants should be able to:

- Discuss the use of intraoperative ultrasound in neurosurgery,
- Describe the ultrasound imaging in neurosurgery.

Activity Goal

This activity is designed to address the following core and team competencies: *Patient Care and Medical Knowledge.*

Non-Endorsement Statement

The provider verifies that sound education principles have been demonstrated in the development of this educational offering as evidenced by the review of its objectives, teaching plan, faculty, and activity evaluation process. The provider does not endorse or support the actual opinions or material content as presented by the speaker(s) and/or sponsoring organization.

Disclosure

The provider adheres to accreditation requirements regarding industry support of continuing medical education. Disclosure of the planning committee and faculty's commercial relationships will be made known at the activity. Speakers are required to openly disclose any limitations of data and/or any discussion of any off-label, experimental, or investigational uses of drugs or devices in their presentations. *All provider employees, activity planners, and course directors in control of content have indicated that they have no relevant financial relationships to disclose.*

Disclosure Summary

The following participants indicated that they have No Relevant Financial Relationships to Disclose:
Llewellyn Padayachy, FCS, PhD; Francesco Prada, MD; Geirmund Unsgard, MD, PhD
